

CEREXIO ELECTRONIC BATCH RECORD SYSTEM

Streamline and simplify batch record processing with ease and intelligence using Cerexio EBR System - the sole Electronic Batch Record System compatible with Industry 4.0 standards. Transform your manufacturing operations in today's fast-paced industrial environment by leveraging the Cerexio EBR System - the definitive cloud-based Electronic Batch Record System on a global scale.

Engage with Cerexio to discover an unparalleled and efficient EBR System designed for contemporary manufacturing experts.

KEY HIGHLIGHTS

The Only One-for-All Electronic Batch Record System for Modern Manufacturing

The Cerexio EBR System is tailored explicitly to ensure compliance within the Food, Beverage, and Pharmaceutical Industries, among others! Uphold rigorous good manufacturing practices while efficiently streamlining the management of manufacturing EBRs, guiding you toward a remarkably successful future with reduced effort, time, and investment!

AUTOMATED TRACKING AND TRACING

The Cerexio EBR System meticulously tracks and logs all routing specifics and entered data, empowering managers and stakeholders to oversee the entire process, identify congested areas, and comprehend the chronological flow of events across processing stages.

INDUSTRY 4.0 COMPATIBILITY

The Cerexio EBR System allows your EBR managers to incorporate AI, IoT, powerful visualisation, and predictive and prescriptive models to optimise and promote precision, quality and cost-efficiency from the bottom line of your manufacturing plants.

OUTSTANDING REVIEWING

Elevate the effectiveness of evaluating quality events by employing streamlined workflows that prioritise exception-based reviews. This method guarantees easy accessibility of all batch-related information to industry specialists, significantly reducing review time.

FLEXIBLE AND SMART

This solution is not only customisable to meet your personalised goals but also smart and fully automated. Thus promoting self-service dashboards that allow all users to retrieve, manage and extract information in a split second.

INTELLIGENT MULTI-INTEGRATION CAPABILITIES

Engineered for seamless integration with your existing systems, ensuring a rapid setup without disrupting operations or necessitating additional investments in new infrastructure. This IoT-ready solution provides instantaneous feedback on crucial parameters and improves data quality.

REAL-TIME SURVEILLANCE

Enhance operational transparency by optimising visibility throughout the manufacturing continuum, offering comprehensive insights and clarity into processes from their initial phases to final execution, thus empowering efficient decision-making.

CEREXIO EBR SYSTEM MODULES

Elevating Manufacturing Precision with Industry 4.0 Innovations for Future-focused Industrial Pioneers

The Cerexio EBR System transforms digital record administration by automating data compilation from various origins, reducing manual input mistakes, and ensuring record precision. Immediate access to electronic batch records enables quick data retrieval, expediting decision-making on its unified platform, consolidating data, and ensuring universal access to relevant information.

Centralised Record Access Hub

This system offers a central hub for comprehensive access to batch records, streamlining data accessibility across stakeholders and departments. It enhances collaboration, expedites decision-making, and ensures synchronised access to critical information.

User-friendly Dashboards

This solution facilitates responsive and interactive dashboards, enabling faster task completion for record-keepers and decision-makers. Users can customise the dashboard, promoting a self-service analytics environment for manufacturing decision-makers.

IoT Fusion, Smarter Integration

Cerexio EBR System excels in integrating devices via IoT, conducting quality reviews, electronically approving batches, and managing batch records effectively.

MES Synergy and More

Reducing operational costs, this system enhances compliance by replacing paper batch records with electronic ones, ensuring data integrity, and meeting legal requirements.

CEREXIO EBR SYSTEM MODULES

Mission-Oriented Configuration

Users can configure electronic batch records based on production demands, linking records with user-defined documents, simplifying inspection, auditing, and device record keeping.

Multi-level Batch Commanding

Offers comprehensive oversight across production stages and batches, ensuring synchronised control in GxP Production and Life Science-related Manufacturing.

Smart Inventory Apex

Boosts inventory management by enabling accurate and swift material routing among Quality Assurance, Warehouse, and Production teams, ensuring uniformity and traceability while minimising errors.

Automated Compliance Ensured

Adhering to cGMP standards, it generates time-stamped audit trails for document changes and uses compliant electronic signatures and automated workflows for seamless operations.

Smart Equipment Log

Centralises equipment summaries, simplifies management for activities like calibration and maintenance and ensures thorough traceability and availability.

THE CEREXIO EBR SYSTEM WAS BUILT BASED ON HIGH DEMANDS BY LIFE SCIENCE AND FOOD EXPERTS AROUND THE WORLD SO IT IS A SOLUTION DESIGNED TO SOLVE THE INTRICACIES OF REAL-WORLD PRACTITIONERS IN THE MANUFACTURING INDUSTRY.

BENEFITS

Join Us To Start Your Journey Towards The Best Quality Of Care, Efficiency And Secured Data Integrity

Cerexio EBR System is endowed with a unique industry 4.0 functionality for review by exception. This solution has reformed a more agile, precise, timely and cost-efficient release process for manufactured batches in the Life Science, Food and Beverage Industries that promotes less human interaction in your factories. Here are some of the benefits in Cerexio EBR System that you cannot afford to miss.

CHARACTERISTICS MAINTAINED

Cerexio EBR System meticulously preserves digital records' five vital traits – contemporary, accurate, legible, attributable, and original – ensuring SOP (Standard Operating Procedures) integrity and quality standards.

PAPERLESS TO THE CORE

Cerexio EBR System champions a paperless culture by digitising and streamlining batch record management, enhancing accuracy, accessibility, and compliance.

ADHERENCE TO COMPLIANCE

Cerexio EBR System ensures adherence to all regulations, covering comprehensive documentation of manufacturing, packaging, and storage of medication batches, aligning with cGMPs and policymakers' requirements.

SAVE ON COST OF QUALITY (COQ)

Cerexio EBR System streamlines processes, significantly reducing the Cost of Quality associated with batch record management and enhancing compliance, productivity, and cost-efficiency.

100% ERROR FREE

Cerexio EBR System guarantees error-free records by eliminating manual transcription errors, ensuring meticulous data accuracy and compliance.

UNIVERSAL INDUSTRY FRIENDLY

Cerexio EBR System is versatile and adaptable across various industry domains, ensuring compliance with global standards and regulations.

INDUSTRIES

Cerexio EBR System is the newly-fangled beacon of innovation for various industrial domains that require compliance conformance and accurate manufacturing operational intricacies. This solution ensures that all production lines, from raw materials to the final checks, are traced, sourced and managed in the best manner possible. Here are a few of the industries that can be greatly benefited by this system:

- Biomaterials
- Continuous Manufacturing
- Cosmetics
- Food and Beverage
- Fragrances
- Gene Therapy
- Genomics
- Hygiene and Personal Care Products
- Laboratories
- Medical Equipment
- Pharmaceutical
- Research and Development

CONTACT US

Don't Hesitate to Get in Touch With Us for Further Clarification or to Book a Demo This Week. The Contact Particulars of Our Company Are as Below:

 Tel: +(65) 6762 9293

 Email: info@cerexio.com

 Address: 21, Woodlands Close, #05-47 Primz Bizhub, Singapore 737854

 www.cerexio.com

 Tel: 1800 270 947

 Email: info@cerexio.com.au

 Address: 81-83 Campbell Street, Surry Hills, NSW 2010, Australia
